**Professional Manufacturer of Laboratory
Equipment And Life Science Instruments**

Company Profile >>

Shanghai Boxun Medical Biological Instrument Corp., founded in 1996, formerly known as Shanghai Boxun Industry & Commerce Co.,Ltd., professionally manufactures laboratory apparatus and medical equipments. It is a modern enterprise which gathers design, produce, develop, sale and serve as an integral whole, and it is a member of Shanghai Medical Instrument Trade Association. Our company has obtained ISO9001:2015 certificate of quality management system registration approval.

Our products include autoclave, test chamber, drying oven, incubator, clean bench, bio safety cabinet and water bath, etc. They are widely applicable in the fields of pharmaceuticals, sanitary and antiepidemic, environmental protection, agriculture and research, etc.

In past more than twenty years, our company operates its business with the management philosophy of "customer first, service forever". We are proud of the supporting with our perfect quality of products and timely service systems. And we sell our products to all parts of the country and overseas.

Today, we follow the advanced technology from USA and improve the functions of products with humanizational design on the production experience of generation product. Our company will supply you one-stop distribution project of laboratory equipments and medical apparatus, then our products can meet the higher requirements of experiments for you.

AUTOCLAVE / STERILIZER	P2-10
PORTABLE AUTOCLAVE	YXQ-LS-18SI, YXQ-LS-18SII/24SII
VERTICAL AUTOCLAVE	BXM-30R, YXQ-LB-SII, YXQ-A/G
	BXM-EI, BXM-FI, BXM-FE
	BXW-SD
	BXH-G
HORIZONTAL AUTOCLAVE	
HOT AIR STERILIZER	
LOW TEMPERATURE INCUBATOR	P11-16
BIOCHEMICAL INCUBATOR/MOULD INCUBATOR	SPX-B-Z, MJX-B-Z, SPX-B-ZII, MJX-B-ZII, BSP, BMJ
CONSTANT TEMPERATURE & HUMIDITY INCUBATOR/MOULD INCUBATOR	BSC, BMJ-C, BXC, BXC-S
FULL TEMPERATURE INCUBATOR/MOULD INCUBATOR	BXQ, BXMJ
HEATING INCUBATOR	P17-21
WATER-JACKET INCUBATOR	BG
CO2 INCUBATOR	BC-J
ELECTRIC HEATING INCUBATOR	HPX, BPX, BXP, BXP-N
MICROBIOLOGICAL INCUBATOR	BXP-S
SHAKER / OSCILLATOR	P22-28
DESKTOP SHAKER	BSD-TX
VERTICAL SHAKER	BXYC-LX
HORIZONTAL SHAKER	BXYC-WX, BXYC-WX-L/C
STACKED SHAKER	BXYC-DX, BXYC-DX-C
WATER / AIR OSCILLATOR	SHZ, THZ
PLANT GROWTH INCUBATOR	P29-33
PLANT GROWTH INCUBATOR	BXG-I
ILLUMINATION INCUBATOR/ARTIFICIAL CLIMATE INCUBATOR	BXL, BXA, BSG, BIC
ARABIOPSIS THALIANA/DROSOPHILA/GERMINATION INCUBATOR	BXAT, BXDF, BXSG
SEED STORAGE INCUBATOR	BSS
OVEN / FURNACE	P34-50
DRYING OVEN	GZX(200°C), BGZ(250°C), GZX/BGZ(300°C), BXH
HIGH TEMPERATURE OVEN	BGG
PRECISE OVEN	BXH-S
FURNACE	SX2-Z, SX2-TZ, SX2-TBZ, SX2-TZ(High-temperature),
	BXSX, BXSX-S
TABLETOP AND VERTICAL FREEZE DRYER	BLG
PILOT FREEZE DRYER	BXFD-S/T
VACUUM OVEN	DZF, BZF, BXK, BXK-S
TEST CHAMBER	P51-58
EXTENSIBLE TEST CHAMBER	BXS-I, BXS-SI
DRUG STABILITY TEST CHAMBER	BXY-I, BXY-SI
GENERAL DRUG STABILITY TEST CHAMBER	BXZ-I, BXZ-SI
PURIFICATION SAFETY EQUIPMENT	P59-62
CLEAN BENCH	BJ-CD, SW-CJ, VS
BIO SAFETY CABINET	BSC-A2, BSC-B2
WATER BATH / OIL BATH	P63-65
ELECTRIC HEATING WATER BATH BOILER	HH.S
ELECTRIC HEATING WATER BATH	SSW
THREE HOLES WATER BATH BOILER	DK-8D
SUPER CONSTANT TEMPERATURE WATER / OIL BATH	CS, CY

AUTOCLAVE

» APPLICABLE SCOPE:

The autoclave is the equipment which utilizes the pressure saturated steam for sterilizing goods quickly and reliable. It is applicable to be used in medical and health work, scientific and agriculture institutes. It is a perfect equipment for sterilizing the medical equipment, dressings, glassware, liquor culture mediums, etc.

YXQ-LS-18SI

» Product Features:

- Electric heating type;
- Self-control when lack of water;
- Self-expanding type seal ring;
- Self-exhaust when over pressure;
- Temperature adjustable (110°C-126°C);
- Sterilizing time adjustable (0-60min).

Pressure Gage

Water Level Safety Float

BXM-30R

» Product Features:

- Made of SUS304;
- Microcomputer intelligent control;
- Self-expanding type seal ring;
- Exhaust cold air automatically;
- Self-control when lack of water;
- Over temperature protection;
- Self-exhaust when over pressure;
- Buzzer reminds when sterilization ends.

YXQ-LS-18SII / YXQ-LS-24SII

» Product Features:

- Microcomputer automatic control;
- Highlight Nixie tube display ;
- Electric heating mode ;
- Automatic control of sterilization process ;
- SUS304 material ;
- Water level safety float ;
- Self expanding sealing ring are used for the inner tank.

YXQ-LB-SII Series

» Product Features:

- Made of SUS304
- Hand wheel type quick-open cover;
- Microcomputer intelligent control;
- Self-expanding type seal ring;
- Exhaust cold air automatically;
- Self-control when lack of water.
- Self-exhaust when over pressure;
- Pressure safety interlock;
- Over temperature protection;
- Buzzer reminds when sterilization ends;
- Equipped with G1/2A internal thread sample test hole.

YXQ-A Series

» Product Features:

- Made of SUS304;
- Hand wheel type quick-open cover;
- Microcomputer intelligent control;
- Self-expanding type seal ring;
- Exhaust cold air automatically;
- Inner circulation exhaust;
- Self-control when lack of water;
- Self-exhaust when over pressure;
- Pressure safety interlock;
- Over temperature protection;
- Buzzer reminds when sterilization ends;
- Equipped with G1/2A internal thread sample test hole

Three control modes:

- heating – sterilization - quick exhaust
- heating – sterilization - slow exhaust
- heating – sterilization - no exhaust

YXQ-A Series

YXQ-G Series

» Product Features:

- Drying function;
- Made of SUS304;
- Hand wheel type quick-open cover;
- Microcomputer intelligent control;
- Self-expanding type seal ring;
- Exhaust cold air automatically;
- Inner circulation exhaust;
- Self-control when lack of water;
- Self-exhaust when over pressure;
- Pressure safety interlock;
- Over temperature protection;
- Buzzer reminds when sterilization ends;
- Equipped with G1/2A internal thread sample test hole.

Work process of sterilization and drying:

- sterilization - natural cooling
- sterilization- automatic exhaust
- sterilization-exhaust-drain-drying

BXM-EI Series

» Product Features:

- PMMA II microcomputer intelligent operating system;
- Touch screen enables real-time viewing of the operating parameters and working status ;
- Positive pressure pulse, 6 level cold air discharge procedure ;
- Equipped with 8 fixed programs +6 custom programs ;
- After sterilization, the 6-stage pressure relief rate is optional ;
- With three-level authority management ;
- The whole machine anti - hot design, heat insulation and beautiful ;
- Hand wheel quick opening structure with dual protection of pressure self-locking and self inspection;
- Equipped with 100-hour countdown reservation function ;
- One key electric drainage ;
- Equipped with boiling point setting function ;
- Standard equipped with condenser + air cooling + secondary water cooling rapid cooling system;
- One waterproof socket, two 485 ports and G1/2A standard test pipe thread holes ;
- Fault detection function, over temperature shutdown protection, water cut-off protection, overpressure self-relief protection, anti-hot protection, overload protection;
- Short circuit protection, leakage protection, independent electronic overvoltage protection and other multiple security.

Model	BXM-60EI	BXM-85EI	BXM-110EI

BXM-FI Series

» Product Features:

BXM-FI is an upgrade from BXM-EI, with similar features, the following functions are added:

- Equipped with vacuum drying function, to avoid the secondary pollution of transfer drying after sterilization.

Optional accessories (BXM-EI/FI)

- Biosafety filter: 0.2μm temperature and pressure resistant filter;
- Special printer: realize date, time, temperature, sterilization process and curve printing ;
- Sample temperature probe: realize the printing of F0 value ;
- Verify the lead.

Sample Temperature Probe

Verify Lead Wire

BXM-FE Series

» Product Features:

- BRIGHT II operating system, 7 inch HD touch screen with adjustable angle, real time display of parameters;
- Peral type door opening structure with dual protection of self-locking and interlocking;
- The system can record alarms, historical data, operation logs, and USB flash drive export backups;
- Standard 26 sterilization procedures+4 melting and insulation procedures;
- Equipped with boiling point setting function ;
- One click exhaust and drainage;
- With reservation function;
- Positive pressure pulse, 6 levels cold air discharge procedure ;
- After sterilization, the 6-stage pressure relief rate is optional ;
- Water level detection+anti dry burning low water level protection function;
- Fault detection function, over temperature shutdown protection, water cut-off protection, overpressure self-relief protection, anti-hot protection, overload protection;
- Short circuit protection, leakage protection, independent electronic overvoltage protection and other multiple security;
- Standard sample temperature probe;
- One 485 data port, one USB port and one G1/2A verification port are standard;
- Optional :biosafety filter, verification lead, embedded printer.

BXW-SD Series

» Product Features:

- BRIGHT I intelligent operating system;
- 7-inch touch screen, real time display of parameters;
- With reservation function;
- Multi level permission management function;
- The system records device events and times on its own, and supports exporting and backing up USB data;
- Support over 1 million data records ;
- Built in 9 sterilization programs+3 melting and insulation programs;
- A 6-level cold air emission program can be established to ensure complete cold air emission Supports three-level exhaust setting ;
- Standard sample temperature probe ;
- Water level detection+anti dry burning low water level protection function;
- Equipped with steam generator and water pump, automatic water addition;
- Optional: printer, stainless steel casing.

BXH-G Series

» Product Features:

- LCD display, real-time display of working status;
- BRIGHT I control system can automatically compensate the value of control parameters according to the change of environment;
- With countdown reservation function, the time range is 0 to 9999min;
- The fan has 6-stage speed regulation, which can meet the different requirements and avoid sample loss caused by dust;
- Programmable design: 10 segment -100 cycle program setting;
- Double over temperature alarm function (A. temperature sensor system, B. independent temperature control switch), to ensure the equipment safe operation;
- Preheating chamber design, to ensure rapid heating and good heat distribution effect;
- Equipped with the inlet and outlet air filters, a RS-485 interface;
- Optional: printer.

LOW TEMPERATURE INCUBATOR

» APPLICABLE SCOPE:

The product is applicable in scientific research institutions, universities and colleges, manufacturing enterprises for environmental protection, sanitation and epidemic prevention, drug testing, farm livestock and aquatic products. It is a dedicated thermostatic equipment for water analysis, cultivation and conservation of bacteria, mould and microorganism by BOD measurement, planting and breeding experiments.

SPX-B-Z / MJX-B-Z Series

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of mirror stainless steel, the shelves can be adjusted optionally;
- PAMMA I control system;
- With timing functions;
- Lighting device in working chamber (mould incubator is equipped with UV light);
- Large viewing angle heat preservation vacuum toughened glass;
- Power supply recovery function, data will not be lost when power failure and system halted.

SPX-B-Z / MJX-B-Z Series

SPX-B-ZII / MJX-B-ZII Series

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of mirror stainless steel, the shelves can be adjusted optionally;
- PMMA II operating system, with over temperature alarm and self-diagnosis function;
- The fan has 6-stage speed regulation, which can meet the different requirements
- 8W fluorescent lamp in working chamber (mould incubator is equipped with 8W UV light);
- Large viewing angle heat preservation vacuum toughened glass is convenient for users to observe;
- Equipped with 220V power socket;
- Frequency conversion refrigeration system, environmental protection refrigerant (R134a), high efficiency, low energy consumption, full temperature continuous frost-free operation;
- Adopt imported compressor unit, low noise, stable performance;
- Power supply recovery function, data will not be lost when power failure and system halted.

BSP / BMJ Series

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of mirror stainless steel, the shelves can be adjusted optionally;
- PMMA II operating system, with over temperature alarm and self-diagnosis function;
- Color LCD backlight display
- With screen lock time, screen saver password setting function, to prevent operation at will;
- Programmable design, it can be set 30 segments 99 cycles;
- Use centrifugal fan to make the temperature of the working room uniform and stable;
- Observation glass inner door;
- Test holes are equipped on both sides, internal diameter is 30mm;
- The fan has 6-stage speed regulation,
- With reservation and timing function;
- Equipped with mechanical lock;
- Equipped with 220V power socket;
- Equipped with fluorescent lamp in working chamber (mould incubator is equipped with UV light);
- Adopt imported compressor unit, low noise, stable performance;
- Power supply recovery function, data will not be lost when power failure and system halted.

BSC / BMJ-C Series

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of mirror stainless steel, the shelves can be adjusted optionally;
- PAMMA II control system, LCD screen displays temperature and time, over-temperature alarm function;
- Use centrifugal fan to make the temperature of the working room uniform and stable
- Double door design, observation glass inner door;
- Test holes are equipped on both sides, internal diameter is 30mm;
- Well-known international brand compressor, non-CFC refrigerant
- Equipped with mechanical lock,
- Integrated type refrigeration system,
- Imported humidity sensor, electric heating humidification system, large capacity water tank;
- Programmable design, it can be set 30 segments 99 cycles;
- Power supply recovery function, data will not be lost when power failure and system halted.

BXC Series

» Product Features:

- 4.3 inch LCD touch screen
- BRIGHT I control system can control parameter values according to environmental changes.
- Programmed multi segment parameter settings: 30 segment 99 cycle design;
- Can store data for more than 5 years (non SD card storage);
- Multi-level password management;
- Variable frequency refrigeration system;
- Equipped with interior door anti fog system;
- Double door design, observation glass inner door;
- Test holes are equipped on both sides, internal diameter is 30mm;
- Imported compressor, imported fan, imported temperature and humidity sensor;
- Over temperature and humidity alarm, over temperature shutdown protection, door open alarm, water shortage alarm, sensor fault alarm, overload protection, leakage protection, compressor over temperature protection, automatic water replenishment function, water and power outage function;
- Optional: online monitoring platform, GPRS SMS alarm, embedded printer, UV sterilization light.

HEATING INCUBATOR

» APPLICABLE SCOPE:

The water jacket incubator is a high precision constant temperature equipment. It is applicable for the plant germination, seedling and microorganism cultivation, insects or little animals breeding, BOD mensuration of water quality monitor and other experiments. It is an ideal apparatus for manufacturing, research, education institutes of biologic descendibility project, medicine, agriculture, forestry, environmental science, animal husbandry and aquaculture.

BG Series

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of mirror stainless steel, the shelves can be adjusted optionally;
- LCD screen, temperature and time control, over-temperature alarm function;
- Heating with water jacket at both sides and bottom of the working chamber;
- A high quality low-noise fan is equipped in the working chamber to ensure the temperature uniformity;
- Power supply recovery function, data will not be lost when power failure and system halted.

BC-J Series

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of mirror stainless steel, the shelves can be adjusted optionally;
- PMMA II control system, LCD screen can display temperature, humidity, and CO2 concentration (TCD sensor type has no humidity display);
- IR sensor type: imported IR CO2 concentration sensor, UV light;
- TCD sensor type: 90°C high temperature moist heat sterilization;
- HEPA offers a filtration efficiency of 99.998% for 0.3µm particulate;
- Imported centrifugal fan with low noise and long life;
- Sound and light alarm function when over-temperature;
- Power supply recovery function, data will not be lost when power failure and system halted.

HPX series

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of mirror stainless steel, the shelves can be adjusted optionally;
- Adopting PMMA I operating system, temperature control, timing, and over temperature alarm;
- Imported motor and fan, intelligent temperature controller with timing function;
- Observation window on the door, convenient for users to observe;
- Nano material magnetic door seal strips and heat preservation material;
- Power supply recovery function, data will not be lost when power failure and system halted.

BXP Series/BXP-N Series(natural convection)

» Product Features:

- LCD display, real-time display of working status;
- BRIGHT I control system, automatically compensate parameters based on the environment;
- With countdown reservation function, the reservation time range is 99 hours 59 minutes;
- Programmable design: 10 segments 100 cycles program setting;
- Double over temperature alarm function (A. controlled by temperature sensor system, B. independent temperature control switch);
- The 6-stage speed regulation of the fan,(BXP-N series no fan);
- Preheating chamber design, to ensure rapid heating and good heat distribution effect;
- Double door design, with glass inner door;
- Equipped with 1 RS-485 interface.

BXP-S Series

» Product Features:

- 5 inch touch screen, BRIGHT II control system, automatically compensate parameters based on the environment;
- Temperature record data and curves, alarm recording information can be viewed in real time;
- Multi-level password management function ;
- With reservation function;
- Store data for more than 10 years, and export them by U disk;
- Double over temperature alarm (a. controlled by temperature sensor system, b. independent temperature control switch);
- The 6-stage speed regulation of the fan ;
- 10 adjustable exhaust rates ;
- Preheating chamber design, to ensure rapid heating and good heat distribution effect;
- 5cm fully enclosed aluminum foil insulation layer, suitable for use in clean laboratories;
- Double door design;
- Equipped with 2 RS-485 interfaces and 1 USB interface;
- Optional: Printer, online monitoring platform, inlet and outlet air filter.

SHAKER

» APPLICABLE SCOPE:

It is widely used in germ culture, ferment, hybridization, and research of biochemical reaction, enzyme and cellular tissue and all those require high temperature and oscillation frequency.

BSD-TX Series

» Product Features:

- Single axis drive, infinitely adjustable oscillation amplitude, oscillation frequency 30-600rpm;
- Intelligent sound and light alarm;
- PMMA II control system, display set and actual parameters;
- Operating parameters have encryption and memory functions;
- Power-off recovery function, the equipment can restore working automatically according to the original setting program when the power is recovered;
- Electrostatic spray plastics housing, mirror stainless steel chamber, toughened glass observation window.

BXYC-LX Series

» Product Features:

- Adopting the BRIGHT I intelligent operating system, it can automatically compensate for control parameter values according to environmental changes;
- 7-inch touch screen, displaying real-time parameters;
- Multi segment programmable, capable of setting 30 segments and 999 cycles;
- With reservation function and multi-level permission operation;
- With event recording function, curve and data viewing function;
- USB storage function, with 1 million data records. Support for USB drive data export;
- High quality compressor, DC motor;
- Tempered glass doors with mechanical locks;
- Humidity control model with water tank (BXYC-LX1***series).

BXYC-WX-L Series

» Product Features:

- The characteristics of the illuminated horizontal intelligent precision shaking table product are the same as those of BXYC-WX series;
- Adopting full spectrum high intensity LED lights, with infinitely adjustable lighting intensity.

LED Light

CO₂

BXYC-WX-C Series

» Product Features:

- The characteristics of the carbon dioxide horizontal intelligent precision shaking table are the same as those of the BXYC-WX series;
- Equipped with high-precision carbon dioxide infrared sensor and pressure reducing valve.

BXYC-DX Series

» Product Features:

- Flip open door design, movable shaking board;
- BRIGHT II control system, it can automatically compensate for control parameter values according to environmental changes;
- 7-inch touch screen, displaying real-time parameters;
- Programmable, 5 pieces, 30 segments, and 99 cycles;
- Equipped with appointment and screen saver functions;
- With event recording function, curve and data viewing function;
- USB storage function, with 150 thousand data records. Support for USB drive data export;
- With reservation function and multi-level permission operation;
- Standard with lights and UV lights;
- Three rotation modes, built-in humidification tray, stainless steel waterproof design;

(The standard configuration is one machine, and the picture is displayed as three machines stack.)

BXYC-DX -C Series

» Product Features:

- The features of the same stacked intelligent precision shaking table product are the same. Imported carbon dioxide infrared concentration sensors are selected with high accuracy;
- Equipped with carbon dioxide pressure reducing valves;
- Each layer is equipped with two electromagnetic valves for fast and slow charging to automatically control the carbon dioxide flow rate, ensuring stable carbon dioxide gas flow rate.

(The standard configuration is one machine, and the picture is displayed as three machines stack.)

SHZ / THZ Series

» Product Features:

- Microcomputer temperature and frequency controller, LCD display screen;
- Stainless steel chamber;
- Equipped with lamp (THZ-98);
- With power outage recovery and parameter memory function;
- Universal spring fixture;
- Equipped with timing function.

PLANT GROWTH INCUBATOR

» APPLICABLE SCOPE:

It mainly provides a stable temperature, humidity and light environment for test samples, accurately simulates the temperature, humidity and light intensity of day and night and seasonal conditions, and provides users with the climatic growth conditions of various plants. It is suitable for seed germination, seedling cultivation, plant growth and tissue culture, plant cultivation and breeding, model biological culture, etc.

BXG-I Series

» Product Features:

- BRIGHT I control system, automatically compensate parameters based on the environment;
- 4.3 inch LCD touch screen;
- Support for viewing alarm records, data, and curves;
- Supports storage of 100000 records and USB data export, multi-level password management;
- Variable frequency cooling, adjustable height partition type light source;
- Full spectrum LED light, each layer of lighting panel can be individually adjusted.

Optional

- Equipped with water storage tank and atomized humidification;
- Imported humidity sensor.

BXL Series (ILLUMINATION INCUBATOR)

» Product Features:

- BRIGHT I control system, automatically compensate parameters based on the environment;
- 4.3 inch LCD touch screen;
- Support for viewing alarm records, data, and curves;
- Supports storage of 100000 records and USB data export, multi-level password management;
- Variable frequency cooling, adjustable height partition type light source;
- Full spectrum LED light, each layer of lighting panel can be individually adjusted.

BXA Series (ARTIFICIAL CLIMATE INCUBATOR)

» Product Features:

- Same features as BXL series;
- Equipped with water storage tank and atomized humidification;
- Imported humidity sensor.

BSG Series (ILLUMINATION INCUBATOR)

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of mirror stainless steel, the shelves can be adjusted optionally;
- PMMA II control system, LCD screen displays temperature, time and illuminance, over-temperature alarm function;
- Observation glass inner door;
- Test hole is equipped on the top, internal diameter is 30mm;
- Well-known international brand compressor, non-CFC refrigerant ;
- Equipped with mechanical lock;
- Integrated type refrigeration system;
- Programmable design, it can be set 30 segments 99 cycles;
- Illuminance can be adjusted in six steps, three-dimensional lighting type;
- Power supply recovery function, data will not be lost when power failure and system halted.

Illumination Board

BIC Series (ARTIFICIAL CLIMATE INCUBATOR)

» Product Features:

- Same characteristics as BSG series;
- Equipped with an external water tank to increase humidity, equipped with an imported humidity sensor.

OVEN/FURNACE

» APPLICABLE SCOPE:

The drying oven (hot-air sterilizer) is applicable for drying, baking, melting and sterilization in dustrial and mining enterprises, laboratories and scientific research institutes.

GZX Series (200°C)

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of mirror stainless steel, the shelves can be adjusted at will;
- PMMA I control system, equipped with temperature control, timing, and over temperature alarm functions;
- Glass observation window, door with rotating two-stage locking structure;
- Preheating chamber design with power supply recovery function.

BXH Series

» Product Features:

- LCD display, real-time display of set temperature and actual temperature value, operation status, fan segment number and working status;
- BRIGHT I control system;
- With countdown reservation function, the time range is 0 to 9999min;
- Programmable design, 10 segments and 100 cycles;
- Double over temperature alarm function (A. temperature sensor system, B. independent temperature control switch);
- The rotary two-stage locking structure;
- The fan has 6-stage speed regulation, preheating chamber design;
- Equipped with a RS-485 interface;
- Optional: Printer, online monitoring platform, inlet and outlet air filter, GPRS SMS alarm.

BGG Series (400°C/500°C)

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of mirror stainless steel, the shelves can be adjusted at will;
- Double press buckle hinge door lock makes the seal tighter;
- PMMA II control system, LCD display, timing, self-tuning function, accurate temperature control;
- Power supply recovery function, data will not be lost when power failure and system halted.

BXH-S Series

» Product Features:

- 5 inch touch screen, BRIGHT II control system;
- 4 million data can be stored, and export them by U disk in unchangeable file format;
- Multi-level password management function, with reservation function, with programmed temperature control function;
- Double over temperature alarm (a. controlled by temperature sensor system, b. independent temperature control switch);
- Programmable design, it can be set 30 segments 99 cycles;
- The 6-stage speed regulation of the fan, electric 10 segment exhaust outlet control;
- Preheating chamber design;
- The rotary two-stage locking structure;
- Equipped with 2 RS-485 interfaces and 1 USB interface;
- Optional: Printer, online monitoring platform, inlet and outlet air filter, GPRS SMS alarm.

SX2-Z Series

» Product Features:

- Adopting the PMMA I operating system, it has the functions of fixed value operation and timed operation. ①
- The heating element can be selected as nickel chromium wire or silicon carbon rod, with good thermal conductivity;
- The furnace and door are made of one-time formed refractory brick material;
- The stainless steel inner door lining design is not easy to crack or discolor;
- Excellent insulation performance. The shell can be controlled within 40 °C when used at high temperatures;
- It is equipped with various safety protection measures such as overcurrent, overvoltage, overheating, leakage, short circuit, door opening and power outage, and can be equipped with ordinary program controllers or intelligent LCD touch screen controllers;
- Note: ① The 1300 degree resistance furnace can only operate at a fixed value, and the timing function requires the optional controller.

FURNACE

SX2-TZ / SX2-TBZ Series

» Product Features:

- Adopting the PMMA II operating system with fixed value operation and timed operation functions: ①;
- Adopting a ceramic fiber furnace with light weight, fast heating, low energy consumption, and good insulation;
- Equipped with a detachable cover plate at 1300 degrees for easy replacement and maintenance;
- Optional ordinary program controller or intelligent LCD touch screen controller. The 380V furnace adopts a splicing structure for easy future maintenance.;
- Note: ① 1300 degrees resistance furnace can only be set for fixed value operation, and the timer function needs to be equipped with a controller.

SX2-TZ Series (High-temperature)

» Product Features:

- Adopting the PMMA II operating system with fixed value and timed operation functions, it can set up 30 temperature control programs;
- Silicon molybdenum rods are selected as heating elements, and the furnace adopts a splicing structure for easy maintenance in the future;
- Ceramic fiber furnace is selected, which is lightweight, fast in temperature rise, low in energy consumption, and well insulated;
- It is equipped with a set of current and voltage display instruments;
- Reinforced hinges ensure that the furnace door is not easily deformed and can be adjusted to lock the door buckle;
- Multiple cooling fans to prevent circuit overheating and ensure safe and reliable use. Equipped with a removable cover for easy replacement and maintenance.

BXSX Series

» Product Features:

- Digital display program controller, accurate temperature control, 30 segments of temperature control program can be set;
- The heating element is Fe-Cr-Al alloy which has good temperature resistance, strong oxidation resistance and long service life;
- Polycrystalline mullite fiber chamber, which has the characteristics of high temperature resistance, easy processing and small thermal conductivity;
- Whole chamber outer wall ventilation design, which can keep the shell within 50°C during working;
- The insulation layer adopts alumina anvil;
- With a group of current and voltage display instrument;
- The cooling fan prevents the circuit from overheating;
- Over current, over-voltage, over heat, leakage, short circuit, open door power off and other safety protections.

BXSX Series

BXSX-S Series

» Product Features:

- LCD touch screen program controller, accurate temperature control, 20 pieces of 40 segments of temperature control program can be set;
- The heating element is Fe-Cr-Al alloy which has good temperature resistance, strong oxidation resistance and long service life;
- Polycrystalline mullite fiber chamber, which has the characteristics of high temperature resistance, easy processing and small thermal conductivity;
- Whole chamber outer wall ventilation design, which can keep the shell within 50°C during working;
- The insulation layer adopts alumina anvil;
- The current and voltage can be displayed in real time;
- Data export, history view, real-time curve, alarm view;
- The cooling fan prevents the circuit from overheating;
- Over current, over-voltage, over heat, leakage, short circuit, open door power off and other safety

BLG Series

» Functional Features:

- PMMA II control system, can display the current cold trap temperature, sample temperature, internal vacuum and other detailed operating parameters;
- With data storage function, support to use USB interface to export view and backup;
- Frequency conversion refrigeration system;
- Imported noise reduction compressor, low noise, stable performance;
- Real-time view of the data curve, easy to understand the sample freezing and drying conditions;
- Standard with a USB interface;
- Optional vacuum pump.

Freeze Area/Loading Capacity	0.12m ²	0.12m ²	0.09m ²	0.12m ²	500 mL×16pcs
Water Capture Capacity			4kg/24h		
Cold Trap Size			Φ215×220mm Φ215×290mm		
Tray Size			Φ195×24mm		
Tray			4(A, B),3(C, D)		
Loading Capacity/Shelf (Liquid)			1500mL(A, B); 1200(C, D)		
Height Between Trays			40mm		
Freezer Rack Size			Φ214×85mm		
Power			0.9kW		
Power Supply			AC220V±10%, 50Hz		
Limit Vacuum			<1Pa		
Cold Trap Temperature			-60°C -60°C/-85°C(optional)		
Environmental Temperature			10°C~30°C		
External Size			600×545×375mm 480×635×850mm		
Net Weight [kg]			85/95		
Gross Weight [kg]			100/110		
Package Size [mm]			700×600×800 730×630×1460		

BXFD-S/T Series

» Functional Features:

- 7" HD touch screen, BRIGHT I control system, large screen display the current cold trap temperature, sample temperature, internal vacuum and other detailed operating parameters;
- Freeze-drying process parameter setting: 36 groups of 40 segments of program design, process editing can be automatically saved, convenient for next use;
- With data storage function, can store more than 30 days of data, and support the USB interface for viewing and backup;
- Frequency conversion refrigeration system, environmental protection, high efficiency, low energy consumption;
- Imported noise reduction compressor, low noise, stable performance;
- Equipped with electric defrosting function, easy to remove the cold trap wall frost;
- Real-time view of the data curve, easy to understand the sample freezing and drying conditions;
- Standard with a USB interface;
- Optional vacuum pump.

DZF Series

» Product Features:

- The shell is made of cold rolled steel plate, the surface is electrostatically sprayed, the inner is made of stainless steel;
- Double screen high brightness Nixie tube display, touch buttons ;
- Microcomputer single-chip temperature control system, temperature control, timing, over temperature alarm functions;
- Timing and timing functions ;
- The door can be adjusted, a silicone rubber door seal, toughened, bulletproof double glass door;
- Power supply recovery function, data will not be lost when power failure and system halted;
- Vacuum pump is optional.

BZF Series

» Product Features:

- The shell is made of cold rolled steel plate, the surface is electrostatically sprayed, the inner is made of stainless steel;
- Microcomputer single-chip temperature control system, temperature control, timing, over temperature alarm functions ;
- LCD Display;
- Timing and timing functions ;
- Temperature can be controlled and displayed independently for each heating shelf;
- The door can be adjusted, a silicone rubber door seal, toughened, bulletproof double glass door;
- Power supply recovery function, data will not be lost when power failure and system halted;
- Vacuum pump is optional.

B XK Series

» Product Features:

- The shell is made of cold rolled steel plate, the surface is electrostatically sprayed, the inner is made of stainless steel;
- Microcomputer single-chip temperature control system, temperature control, timing, over temperature alarm functions
- Timing and timing functions ;
- Temperature can be controlled and displayed independently for each heating shelf;
- Integrated design, standard vacuum pump placed inside the noise reducing cabinet;
- The door can be adjusted, a silicone rubber door seal, toughened, bulletproof double glass door;
- Power supply recovery function, data will not be lost when power failure and system halted;
- Optional: Oil filter.

B XK-S Series

» Product Features:

- The shell is made of cold-rolling steel with static spray plastics, the working chamber is made of stainless steel with arc angle design which is convenient to clean;
- Microcomputer control system with temperature and time control and over temperature alarm, LCD screen;
- Timing and timing functions ;
- Temperature can be controlled and displayed independently for each heating shelf;
- Integrated design, standard vacuum pump placed inside the noise reducing cabinet;
- The door can be adjusted, a silicone rubber door seal, toughened, bulletproof double glass door;
- Power supply recovery function, data will not be lost when power failure and system halted;
- The vacuum degree can be displayed and controlled directly;
- Optional: Oil filter, intelligent touch screen controller.

TEST CHAMBER

» APPLICABLE SCOPE:

By using a scientific method, it creates a long-time stable temperature, humidity conditions required for evaluation of drug failure. As the optimal choice for pharmaceutical companies to test drug stability, it is suitable for the accelerated tests, long-term experiments, high-temperature tests of drugs and new drugs in pharmaceutical companies.

BXS-I Series(EXTENSIBLE TEST CHAMBER)

BXY-I Series(DRUG STABILITY TEST CHAMBER)

BXZ-I Series(GENERAL DRUG STABILITY TEST CHAMBER)

» Product Features:

- BRIGHT I control system can automatically compensate the value of control parameters according to the change of environment;
- Programmable multi-segment parameter setting: 30 segments 99 cycles design;
- The controller can store data records for more than 5 years (not stored by SD card), and record equipment events with exact time, and export them by U disk in unchangeable file format for viewing and backup, and trace the data;
- Multi-level permission operation;
- Support data and curve online viewing;
- The circulating air volume can be adjusted manually according to the sample loading condition;
- Rapid recovery of temperature and humidity after opening the door;
- Protection function: upper and lower limit over temperature alarm, over temperature shutdown protection, door open alarm,water shortage alarm, sensor fault alarm, overload protection, leakage protection, compressor over temperature protection;
- Glass observation inner door design;
- Equipped with mechanical lock;
- Equipped with printer.

PURIFICATION SAFETY EQUIPMENT

» APPLICABLE SCOPE:

The bio safety cabinet is a negative pressure safety device which widely used in microbiology, biomedicine, gene recombination, animal experimental and biological products for scientific research, teaching, clinical examination and production. It adopts advanced air purification technology and negative pressure box design, and it realizes the protection of the environment, users and samples, It is the most basic safety equipment in laboratory biosafety protection.

BJ-CD Series (Vertical Airflow)

» Product Features:

- Adopting a color LCD display screen to display wind speed, cumulative working time, clock, HEPA operating status, etc;
- Equipped with an efficient HEPA air filter, the machine can provide audible and visual alarm prompts in case of HEPA failure or damage;
- This machine adopts a centrifugal fan, with a high-quality cold-rolled steel plate shell and electrostatic spray molding. The operating console is made of SUS304 brushed stainless steel;
- Equipped with a counterweight sliding door, it can be positioned within the specified range;
- The interlocking device for lighting and sterilization lights ensures safe use;
- Equipped with a built-in waterproof socket and air and water source interfaces;
- The front is tilted at a 5 ° angle for more comfortable operation;
- Equipped with movable casters and positioning balance columns, it is flexible in movement and easy to fix.

SW-CJ / VS Series (Vertical Airflow)
SW-CJ Series (Horizontal Airflow)

» Product Features:

- Cold-rolling steel plate housing with static spray plastics, SUS304 worktable;
- Centrifugal fan which has steady rotate speed and low noise;
- LCD control system, touch type switch, six steps of wind speed control;
- Independent control of UV light and lamp, timing range of sterilization is 0 to 999min;
- Vertical quasi closed table, the down airflow formed in the operation area can prevent the air outside from permeating and keep the operation area clean; (Excluding horizontal flow);
- Equipped with HEPA, the pre-filter is set as the medium efficiency filter system to extend the service life of HEPA.

BSC-A2 Series

» Product Features:

- Air clean intelligent control system, color high-definition LCD display screen, real-time display of inflow/descent wind speed value, filter lifespan value, working status of fan, lighting, UV, power interface, and display of abnormal prompts;
- Equipped with calendar and time display, as well as UV sterilization appointment and timing functions. Intelligent constant wind speed technology, using high-performance wind speed sensors, ultraviolet sterilization lamps, and lighting interlocking protection;
- Equipped with front window limit protection, using imported brand HEPA (ISO level 5) high-efficiency filter, capable of 0.3 μm. The filtering efficiency of dust particles can reach over 99.995% (ULPA (ISO4 level) high-efficiency filter is optional, and the filtering effect can reach 99.9995%);
- The preset filter failure and damage alarm technology, the device has low energy consumption standby mode;
- The visual front window is designed with a 10 degree tilt angle that meets ergonomic principles;
- The interior wall of the studio is designed with SUS304 stainless steel as a whole, removable SUS304 brushed stainless steel operating table ;
- With standard anti splash AC socket and reserved water and air interfaces.

BSC-B2 Series

» Product Features:

- Split style structure, the demountable rack has moveable castors and balance adjusting screw rods;
- Air clean intelligent control system, color high-definition LCD display screen, real-time display of inflow/descent wind speed value, filter lifespan value, working status of fan, lighting, UV, power interface, and display of abnormal prompts;
- Equipped with calendar and time display, as well as UV sterilization appointment and timing functions. Intelligent constant wind speed technology, using high-performance wind speed sensors, ultraviolet sterilization lamps, and lighting interlocking protection;
- Equipped with front window limit protection, using imported brand HEPA (ISO level 5) high-efficiency filter, capable of 0.3 μm. The filtering efficiency of dust particles can reach over 99.995% (ULPA (ISO4 level) high-efficiency filter is optional, and the filtering effect can reach 99.9995%);

WATER BATH / OIL BATH

» APPLICABLE SCOPE:

The water bath boiler is used for precise constant temperature and assistant heating in medical sanitation, industry and mining enterprises, scientific research institute and medical college for inspecting and testing pathology blood serum.

HH.S Series

» Product Features:

- Quality steel housing with static spray plastics, stainless steel chamber;
- The temperature control system adopts high precision sensor and integrate circuit, precise and reliable;
- Diagnostic function of key electronic components.

SSW Series

» Product Features:

- Quality steel housing with static spray plastics, stainless steel chamber;
- The temperature control system adopts high precision sensor and integrate circuit, precise and reliable.

DK-8D

» Product Features:

- Stainless steel chamber and cover;
- Three holes independent temperature control;
- Timing boot and shut down, working at constant value, timing up to 99 hours;
- Sensor fault alarm, upper and lower limit temperature deviation alarm, over temperature alarm and parameter memory;
- Temperature display correction, self-diagnosis and dynamic control technology.

CS / CY Series

» Product Features:

- Internal circulation and external circulating pump system;
- Measured value deviation correction function;
- High-efficiency heat preservation material;
- 0.1 accuracy for LED dual window display of temperature measurement values and set values, 0.01 accuracy for LCD display, touch buttons;
- Circulating pump flow ≥ 8 L/min, the external diameter and internal diameter of external circulation access interface are 10mm and 8mm respectively.
